DEPARTMENT OF LEGISLATIVE SERVICES

OFFICE OF POLICY ANALYSIS MARYLAND GENERAL ASSEMBLY

Warren G. Deschenaux Director

November 2014

The Honorable Thomas V. Mike Miller, Jr., President of the Senate The Honorable Michael E. Busch, Speaker of the House of Delegates Honorable Members of the General Assembly

Ladies and Gentlemen:

Development impact fees and building excise taxes are a way for local governments to defray costs of additional or expanded public facilities/services by collecting revenue from development that is creating or contributing to the expanded need for facilities/services. These charges have been the subject of State and local legislation in past years, in some cases increasing and/or restructuring the amounts of the charges and in others providing some manner of relief from the charges, whether in general or for certain types of development.

With the aim of providing a resource for up-to-date and comparative information on these charges, this report compiles information on the amounts and rates of the development impact fees and building excise taxes imposed by Maryland counties, as well as information on the amount and use of revenue generated by the fees and taxes.

This report was prepared by Crystal Lemieux and reviewed by Hiram Burch and Scott Kennedy. Marsha Moore prepared the manuscript. The Department of Legislative Services trusts that the information will be useful to members of the General Assembly and to other persons interested in matters relating to managing local growth in Maryland.

Sincerely,

Warren G. Deschenaux Director

WGD/mm

County Development Impact Fees and Building Excise Taxes in Maryland

Introduction

Development impact fees and building excise taxes enable local governments to collect revenue from builders for public facilities necessitated by new residential or commercial development. As a result of these development charges, local governments are able to shift the costs of financing new public facilities from existing taxpayers to individuals responsible for the development. In many situations, the use of such development charges may eliminate the need for jurisdiction-wide tax increases. Another benefit of development charges is that local officials can collect the needed revenue for the expansion or construction of new public facilities prior to the construction of any new residential development. Payment of an impact fee or excise tax is often required by local officials before the issuance of a building permit.

It is difficult to define a precise distinction between development impact fees and building excise taxes imposed by Maryland counties. In a 1990 Maryland Court of Appeals decision (Eastern Diversified v. Montgomery County), an impact fee was determined to be an unauthorized tax because its primary purpose was not to regulate the impact of development (under the county's existing regulatory authority), but to raise revenue for road construction benefiting the general public. Similarly, a 2004 Maryland Attorney General Opinion (89 Opinions of the Attorney General 212), evaluating whether, absent authority to impose a tax, a municipality could impose an impact fee under its existing regulatory authority, applied the "rational nexus" test. Under the test, an impact fee is valid as a regulatory measure if the fee relates to needs attributable to new development and the revenue collected is earmarked for the substantial benefit of the development charged.

However, as with counties that impose building excise taxes, the Maryland counties that impose impact fees have specific authorizations to do so from the General Assembly which for the most part do not explicitly include a level of restrictions similar to those set out in *Eastern Diversified* and the 2004 Attorney General Opinion. The Attorney General's Office has advised in the past that certain specific General Assembly authorizations for individual counties to impose an impact fee in fact authorize a tax, and most of the authorizations are similarly worded.

The Department of Legislative Services conducted a survey of a number of county planning officials and county attorneys in 2010 regarding the distinction between impact fees and excise taxes. The local officials in general indicated that impact fees are based upon and used to mitigate the impact of a given development (or development within a certain area) on public facilities, while excise taxes are comparatively free of restrictions on their amount and use. A number of counties that impose impact fees indicated that they viewed themselves as subject to restrictions not explicitly stated in the General Assembly authorizations for the fees. Therefore, whether or not they may have broader authority and discretion, the counties appear to generally seek to conform

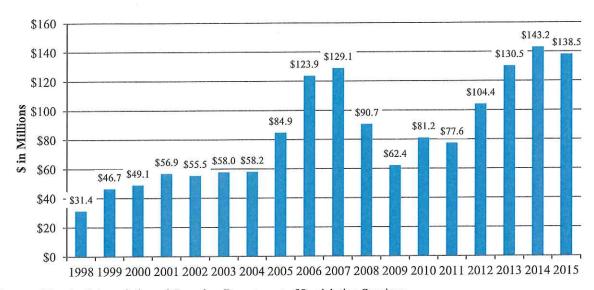

to the principle that the amount and use of development charges authorized as "impact fees" be in some manner connected to the impact of the development paying the fee on public facilities.

For purposes of clarification, county development impact fees and building excise taxes, as referred to and identified in this publication, are those charges generally termed development impact fees or building excise taxes, or a variation of those terms (also, in some cases, "surcharge" is used). Development impact fees and building excise taxes, as characterized in this report, however, do not necessarily encompass all charges that are imposed by counties on new development to help pay for new or expanded public facilities. Some jurisdictions, for example, impose water- and sewer-related charges affecting new development, such as connection charges or system development charges, that may serve a similar purpose as impact fees or excise taxes, generating revenue for costs associated with new or expanded facilities. In addition, though not included in this report, a number of municipalities impose impact fees or similar charges on new development.

Local Rates and Revenues by County

Development impact fees and building excise taxes are imposed in 16 counties in Maryland. Prior to 2008, overall development impact fee and building excise tax revenues were, for the most part, increasing each year. From fiscal 1998 to 2007, county revenues from development impact fees and building excise taxes increased from \$31.4 million to \$129.1 million as shown in **Exhibit 1**. Due to the downturn in the real estate market, impact fee and excise tax revenues declined by 30% in fiscal 2008 to \$90.7 million and by another 31% in fiscal 2009 to \$62.4 million. Recent collections have been higher, reaching \$130.5 million in fiscal 2013, with estimated revenues in fiscal 2014 and 2015 of \$143.2 million and \$138.5 million, respectively.

Exhibit 1
Development Impact Fees and Excise Taxes
Maryland Counties
Fiscal 1998-2015

Source: Maryland Association of Counties; Department of Legislative Services

In fiscal 2015, estimated revenues for individual counties range from \$60,000 in Caroline County to \$58.4 million in Montgomery County. On a per capita basis, estimated revenues for fiscal 2015 range from \$1.84 in Caroline County to \$60.52 in Charles County. Exhibit 2 lists the various impact fees and excise taxes, legislative references, the fiscal 2015 fee amount or tax rate, and the estimated fiscal 2015 revenues for each county. Exhibit 3 provides more detailed information on the development impact fees and building excise tax rates applicable to single-family development for each county in fiscal 2013 through 2015. A further detailed listing of the fee amounts and tax rates beyond those applicable to single-family development for fiscal 2015 is provided in the appendices. Exhibit 4 shows the revenue collections for fiscal 2013 and the estimated revenues for fiscal 2014 and 2015.

Governmental Uses

Public facilities/services funded by development impact fees and building excise taxes include public school construction, libraries, community colleges, transportation, public safety, parks and recreation, and utilities. In fiscal 2013, 75.6% of development charges was targeted to education-related projects while 21.0% was targeted to transportation projects – the two leading governmental uses for these revenues. Of the revenues estimated for fiscal 2015, 81.4% is expected to be allocated to education-related projects and 16.1% is expected to be allocated to transportation projects. Education-related projects include funding for public schools, libraries, and community colleges. Exhibits 5, 6, and 7 show the governmental uses for development impact fees and building excise taxes collected in fiscal 2013 and the allocation of the estimated revenues for fiscal 2014 and 2015 among the different governmental uses.

Washington	\$3.00/sq. ft.	\$1.00/sq. ft.	\$1.00/sq. ft.
Wicomico	5,231	5,231	5,231

¹ Fees/rates listed are generally those applicable to single-family detached dwellings and are per dwelling unless otherwise indicated.

Source: Department of Legislative Services

² Rates are for a 2,000-2,499 square foot residential unit. Residential rates vary by the square footage of a unit.

³ A \$750 development excise tax for agricultural land preservation is also imposed on new lots created by subdivision in a "rural district."

⁴ A slightly higher rate, \$3,765 per dwelling, applies outside of the Cambridge and Hurlock areas.

⁵ The rates shown reflect the public school and library impact fee total. A roads tax of \$0.10/sq. ft. or \$0.25/sq. ft. (depending on the square footage), with the first 700 square feet not taxed, was reduced to \$0.00 effective in November 2011.

⁶ Fiscal 2013, 2014, and 2015 amounts represent the total of the roads tax amount (\$1.08/sq. ft., \$1.13/sq. ft., and \$1.15/sq. ft., respectively) and the school surcharge amount (\$1.21/sq. ft., \$1.24/sq. ft., and \$1.25/sq. ft., respectively). Fiscal 2014 and 2015 amounts represent \$13,506 for transportation and \$25,944 for schools. Fiscal 2013 amount represents \$12,425 for transportation and \$23,868 for schools. The school excise tax is increased by \$2 for each square foot between 3,500 and 8,500 gross square feet. Different transportation rates apply in the Metro Station and Clarksburg impact tax districts.

⁸ Fiscal 2015 amount represents \$15,489 for school facilities and \$7,314 for public safety. A lower school facilities rate (\$9,035 in fiscal 2015) applies inside the beltway and to certain development near mass transit and a lower public safety rate (\$2,439 in fiscal 2015) applies inside the "developed tier" as defined in the 2002 Prince George's County Approved General Plan and to certain development near mass transit.

⁹ A lower rate (\$5,877 in fiscal 2015) applies to development inside municipalities.

¹The transportation impact tax is imposed on each property according to which of the three impact tax districts the property is located in. 2011 county legislation also created a White Flint Impact Tax District in which the transportation development impact tax rates are set at \$0, but can be changed by county council resolution.

²The public school impact tax on any single-family detached or attached dwelling unit is increased by \$2 for each square foot of gross floor area that exceeds 3,500 square feet, to a maximum of 8,500 square feet.

Surcharges in Prince George's County Fiscal 2015

Location of Development	<u>Levy</u>	School Facilities ¹	Public Safety
Outside of the Capital Beltway	per unit	\$15,489	
Inside of the Capital Beltway/Near mass transit ²	per unit	9,035	
Outside of the developed tier	per unit		\$7,314
Inside of the developed tier/Near mass transit ³	per unit		2,439

¹ Pursuant to Chapter 685 of 2013, through September 2018, the school facilities surcharge is reduced by 50% for multifamily housing in specified transit areas and does not apply to studio and efficiency apartments in specified urban and transit areas. Various other previously established exemptions also apply.

Source: Prince George's County

² Development "near mass transit" is development included within a basic plan or conceptual site plan that abuts an existing or planned mass transit rail station site operated by the Washington Metropolitan Area Transit Authority.

³ Development "near mass transit" is development within an area included in a basic plan or conceptual site plan that abuts an existing or planned mass transit rail station site operated by the Washington Metropolitan Area Transit Authority and that complies with the requirements of any sector plan, master plan or overlay zone approved by the Prince George's County District Council.
